

NIST Cybersecurity Framework 2.0

CoAction's objective is to protect & inspect assets to provide an inventory of assets and vulnerabilities to support the data required to help meet the IDENTIFY, PROTECT, DETECT phases of the NIST Cybersecurity Framework (CSF).

1. Govern

- Organizational Context
- Risk Management Strategy
- Roles, Responsibilities, & Authorities
- Policy
- Oversight
- Cybersec Supply Chain Risk Management

2. Identify

- Asset Management
- Risk Assessment
- Improvement

3. Protect

- Identity Management, Authentication, & Access Control
- Awareness and Training
- Data Security
- Platform Security
- Technology Infrastructure Resilience

4. Detect

- Continuous Monitoring
- Adverse Event Analysis

5. Respond

- Incident Management
- Incident Analysis
- Incident Response Reporting & Communication
- Incident Mitigation

6. Recover

- Incident Recovery Plan Execution
- Incident Recovery Communication
